

Provides spatial coordinates
in the form of {x, y}
or {x, y, z}

Provides temporal
coordinates
in the form of {t}

Provides grouping factor(s)
with at least invidual {id}
(other levels optional)

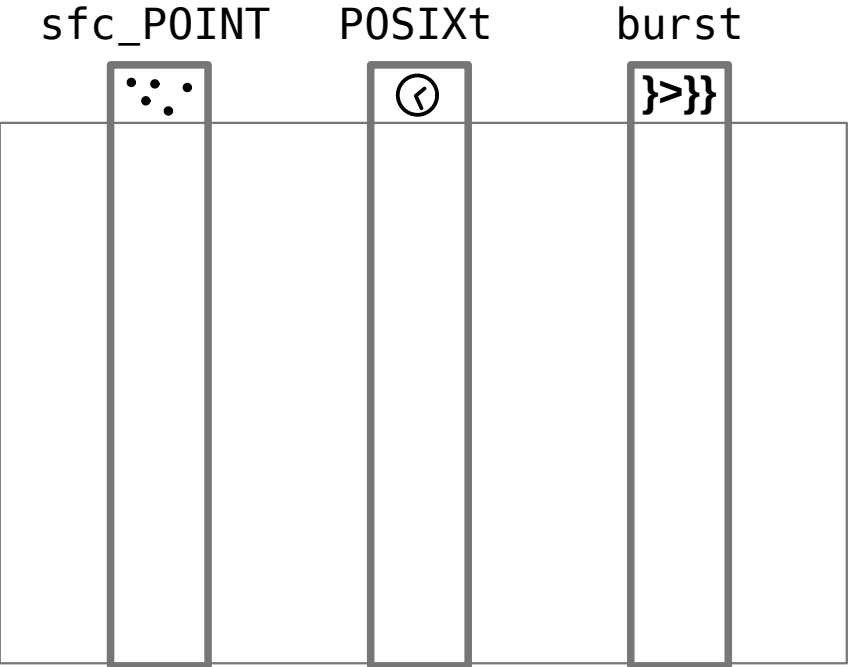

data.frame of
spatial coordinates
+
independent vectors

`sftrack(coords = <df[, c(<x>, <y>, <z>)]>, timestamp = <POSIXt>, burst = list(<vectors>))`

sftrack

Class ("sftrack", "sf",
["tbl_df"], "data.frame")
