

Provides spatial coordinates  
in the form of {x, y}  
or {x, y, z}

Provides temporal  
coordinates  
in the form of {t}

Provides grouping factor(s)  
with at least invidual {id}  
(other levels optional)

sfc\_POINT      POSIXt      vector(s)

data.frame  
\* or tbl\_df

Class ("sf", ["tbl\_df"],  
"data.frame")

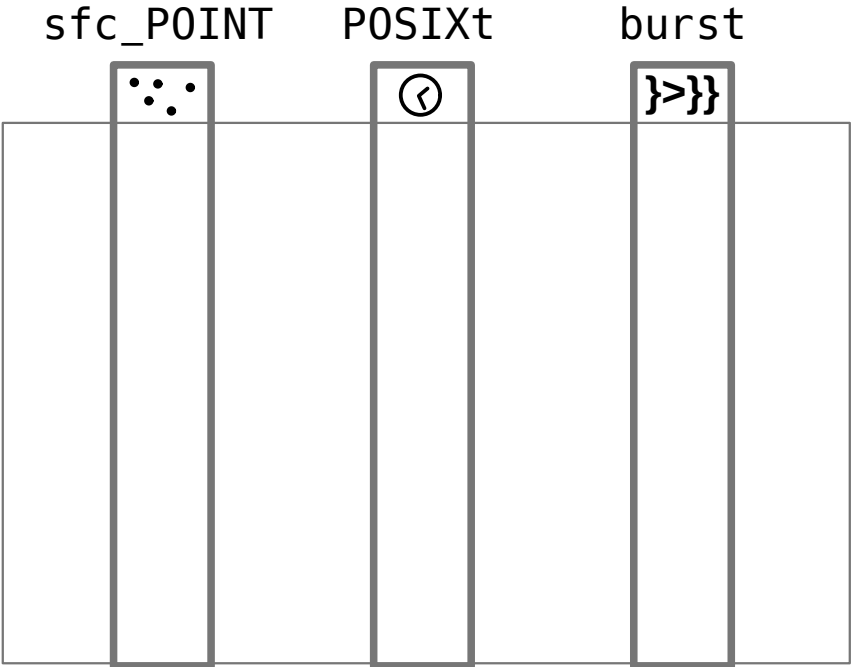

sftrack(data = <sf>, coords = <sfc\_POINT>, timestamp = <POSIXt>, burst = list(<vectors>))

default "geometry"      default "t"      default "ind"

sftrack

Class ("sftrack", "sf",  
["tbl\_df"], "data.frame")

sfc\_POINT      POSIXt      burst

"geometry"  
argument

"timestamp"  
argument

"burst"  
argument
